

EMC DECON SHOWER & BASIN

The **EMC Decon Shower and Basin** are designed for larger scale incidents. The system includes one **Stainless Steel Hazmat Shower** equipped with nine spraying nozzles. The Hazmat Shower is very compact in design and folds for ease of transport and storage. The all stainless steel construction makes it extremely durable and corrosion resistant.

Included and installed on the shower assembly is an **EMC.ACD112C** shut off valve which allows the option to flow water to only the lower part of the body. In many cases this is the main area of the body that requires decontamination. This feature conserves water and reduces the amount of contaminated water collected for disposal.

The shower is equipped with a Polyethylene Curtain to prevent over spray of contaminated water during windy conditions. The shower curtain is equipped with four wind anchor cords that attach to the corners of the inflatable basin to keep the curtain firmly in place during windy conditions. The system also includes one **Deko Basin 250**. The basin is inflated with compressed air from a standard BA cylinder or electrically operated blower. The basin is equipped with interchangeable liners that can be removed for ease during cleaning. The basin's tubular airframe is equipped with a built in pressure valve to prevent over pressurization of the airframe. The Decon Shower and Basin assembly can be deployed in less than two minutes time by one person. This system is ideal for First Responder Emergency Crews, Fire Departments, FEMA Teams, Hospitals, Military and Industrial Safety Teams. The system is simple to erect and designed for fast deployment.

The system includes:

- 1 each **P/N EMC.ACD112A** - Hazmat Stainless Steel Shower assembly
- 1 each **P/N EMC.ACD112C** - Shut off valve assembly
- 1 each **P/N EMC.ACD112B** - Shower Curtain with zipper and stainless steel frame assembly
- 1 each **P/N EMC.ACD111D** - Deko Basin 250 with liner

* The above items can be purchased separately or as a complete system.

- 1 each **P/N DECON-102** EMC Decon Shower and Basin System

* See our complete line of water supply and waste water containment accessories including Water Heaters, Detergent Inducers, Pressure Sensitive Pumps, Water Supply Reservoirs, Waste Water Pumps, and Waste Water Containment Bags.
